

SORTING UNITS WITH WEIGHING SYSTEM

These units help to fight food waste by raising awareness among diners. They can see the weight of their own waste in real time. This data can then be downloaded onto a simple USB stick and used in Excel. This is a must-have tool for tracking the volume of waste from each meal and optimising the make-up of future menus.

SORTING UNITS

These are designed to be placed in the dining area against a wall. They are ergonomic with a tray rest to facilitate subsequent operations. They allow for sorting of waste, then storing glasses, cutlery and plates before being taken up by the washing up staff. A hinged door under the tray rest provides access to bags for disposal.

PRE-SORTING UNITS

These are designed for waste management. They come with a tray rest to facilitate the operation. The central pre-sorting units include bag holders, 800 mm high, accessible from the rear for waste disposal. The wall pre-sorting units have bag holders, 600 mm high arranged behind hinged doors accessible under the tray rest.

PRE-SORTING TABLES

Boasting a simple design without tray rest or cladding, the pre-sorting tables are designed for waste management in the dining area. They have bag holders accessed from the rear for waste disposal. They come in a central version or a version against a wall with curved splash back.

This trolley designed as an incentive to teach schoolchildren to manage the consumption of bread from an early age. The product has two cursors, the first of which makes it possible to determine the original level of waste and the second, the target bread waste at the end of the period.

Colours to match the cladding of Tournus sorting and pre-sorting units.

Delft Blue	Chilli Red	Brilliant Yellow	Citrus Yellow	Lime Green	Orange	Fuchsia Pink
